

# MAGICSORBLAP

## WHAT IS MAGICSORBLAP?

**MAGICSORBLAP** is a **NON-TOXIC** inert blend of minerals that are combined in a manufacturing process to make the most effective and efficient absorbent available.

The product contains no hazardous ingredients as defined by the Health and Safety at Work Act 1974 and World Health Organization (WHO).

Developed to reflect the growing demand for a product for use in the home or shop environment **MAGICSORBLAP** is an essential addition to your spill prevention needs. The impact of red wine spills on carpets can be immediately reduced by the use of **MAGICSORBLAP**. Pet accidents, baby burps and much more can all be handled by the product, you have to use it to believe its power. In the garage or home, paint or even worse oil spills can all be handled.

Use is simple just pour on, sweep in and brush or vacuum up.

If you've got a messy pet and you need help to clean up, then look no further.

**MAGICSORBLAP** is capable of absorbing liquid spills of animal, mineral, chemical or vegetable based substances. This lightweight premium product is non-toxic, non-flammable and environmentally safe and friendly. The product will not harm asphalt, cement, carpet, tile, soil, and animal or plant life.

**MAGICSORBLAP** can be used without cloth or paper towels. The product itself turns a wet spill into a dry powder that can be vacuumed or swept to remove. The product is useful in the kitchen, work shop, garage, vehicle, laundry or any other room where you may have a spill. It is also a superior product to use on the job.

## AREAS OF USE

### Car:

Coffee, Tea, Wine, Soft Drinks, Body Fluids, Liquid, Liquid Detergents

### Home:

Oils, Eggs, Soft Drinks, Body Fluids, Animal Accidents, Grease

### Workshop/Garage:

Paint, Transmission Fluid, Paint Thinner, Varnish, Gasoline, Kerosene, Oil, Antifreeze, Grease, Pool Chemicals

### Any Other Liquid:

**Except Hydrofluoric acid**

# MAGICSORBLAP

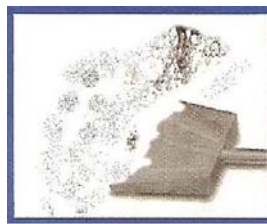

## HOW TO USE

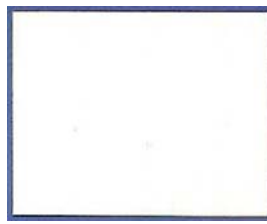

Surround and cover with  
MAGICSORBLAP

Using a stiff bristle  
broom or brush, work  
in a circular motion.

Sweep or vacuum spill.  
If spill area is still  
moist, repeat previous  
instructions

When used properly,  
MAGICSORBLAP will leave  
the floor clean and dry

## WHY CHOOSE MAGICSORBLAP PREMIUM ABSORBANT

### ENVIRONMENTAL:

MAGICSORBLAP when used properly, does not release material absorbed into landfills; it is non-biodegradable. MAGICSORBLAP has passed the EPA's, TCLP (Toxicity Characteristic Leaching Procedure) and PFT (Paint Filter Test)

### EFFICIENCY AND SAFETY:

MAGICSORBLAP leaves no residue, therefore no slip hazards. MAGICSORBLAP is completely safe to use; no health hazards or carcinogenicity. MAGICSORBLAP weighs only 10lbs as compared to fifty pounds for clay-based "kitty-litter" type absorbents. Thus, it is much easier to handle, greatly reducing the risk of back injury.

### SIMPLIFICATION ON STOCKING:

MAGICSORBLAP can be used for all liquids (**except hydrofluoric acid**), thereby reducing the need for special purpose absorbents.

### TOTAL COST:

A bag of MAGICSORBLAP is equivalent to three or more 50lb bags of clay-based absorbents. The total cost including labour cost to pick up a spill and dispose of the waste materials is considerably less than when using other absorbent materials. Cost savings realised by using MAGICSORBLAP can range from 25% to 75% depending on the cost of disposal for a specific liquid.

## HELPFUL HINTS

### PAINT (oil and/or water based):

When cleaning up a paint spill, speed is most important. However, if the paint has begun to dry, use paint thinner for oil based and water for water based to re-wet the spill. Then follow the standard how to use instructions. A medium to stiff bristle broom is recommended for this application.

### PETROLEUM PRODUCTS:

**PETROL /DIESEL/JET FUELS:** These products absorbed with MAGICSORBLAP will still be flammable

MAGICSORBLAP will decrease flammability immediately but not completely.

**HYDRAULIC/BRAKE and TRANSMISSION FLUID/MOTOR OIL:** Follow how to use instructions. MAGICSORBLAP becomes saturated when you can no longer see any white powder. If MAGICSORBLAP turns to a paste, remove the top coat and reapply MAGICSORBLAP.

**MOTOR OIL/EXISTAIN STAIN:** Re-wet the stain with a degreaser, work in with a broom. Immediately follow standard instructions. Repeat until stain is mostly removed.

**GREASE:** This may be a multi-step process. The first step is to remove what you can. Then reapply and continue until grease is absorbed. If MAGICSORBLAP turns to a paste, remove the top coat and reapply. If spill is large the back of a garden rake or similar instrument may help cut into spill easier.

### GLYCOL (antifreeze):

MAGICSORBLAP will absorb antifreeze by following standard instructions.

### FOOD SUBSTANCES – Liquid or semi-liquid:

MAGICSORBLAP will absorb molasses, jams/jellies, peanut butter, vegetable oils, egg, mayonnaise, soft drinks/juices, etc. For all spills containing glass from the broken container apply MAGICSORBLAP and work your broom in a circular pattern, then sweep up the glass and the absorbed liquid at the same time. This eliminates having to remove the glass first.

### BODILY FLUIDS

MAGICSORBLAP works very fast on bodily fluids as well as helps to diminish the odour normally associated with these: Vomit, Urine and Blood.

### CHEMICALS – hazardous & non-hazardous

MAGICSORBLAP is a non-selective absorbent, with only one exception – **do NOT use with Hydrofluoric Acid** \*\*. MAGICSORBLAP absorbs herbicide, bases, alkaline, solvents, acids and 99% of any other liquid or semi-liquid you may encounter.

**\*\* LETHAL TOXICITY WARNING:** Do NOT attempt to pick up Hydrofluoric Acid. The combination of MAGICSORBLAP and hydrofluoric Acid produces Tetrahydrofluoric Gas; a substance which can be lethal if inhaled.
